

CASTLEMILK MOORIT

Naturally Coloured

Established in the UK: 20th century

ORIGINS

Developed in the 1900's by Sir Jock Buchanan-Jardine, on his Dumfriesshire estate at Castlemilk, by crossing Shetland Moorit ewes with Manx Loaghtan and Mouflon rams.

CHARACTERISTICS

Vigorous and self-reliant. Long-legged with a short tail. A tightly grown soft moorit (light tan) fleece of demi-lustrous wool with white patches. Ewes have two uniform, wide-spreading horns, the rams' horns spiral.

LOCATION

South West Scotland.

MAIN USES

Craft.

**Breed Society
Established:**
1975

Handle:
Very Soft/Silky
