

2020 PRODUCER INFORMATION AND WOOL VALUES

Together we're growing something special.

britishwool.org.uk

A MESSAGE FROM JOE FARREN CEO BRITISH WOOL

How has demand been impacted by the current crisis?

As British Wool enters its 70th year of operation the UK, and indeed the world, faces the most severe recession in its history due to the Covid-19 epidemic. It is true that over the years we have had to deal with foot and mouth outbreaks as well as the financial crisis of 2008, but those events were far less serious than the Covid-19 related economic crisis. The markets for other agricultural products such as lamb, while disrupted by Covid-19 to a greater or lesser degree, have remained open throughout the crisis. The global market for cross bred wool has been shut since February and remains closed at time of writing. February to May is normally the busiest selling period of the year. As a result we have circa 9m kgs of unsold stock out of a total 2019/20 clip of 27m kgs.

What does this mean for balance payments?

In order to calculate the wool values for 2019/20 payable to you we have had to place a value on this unsold stock which is at a significant discount to the last prices sold. As a result the average price paid to producers for the 2019/20 clip will be 32p/kg. Balances are being paid as normal upon receipt of this season's wool. It is important to remember this is an average price for all wool grades in the UK, with some mountain wools achieving 15p/kg and some finer white wools more than 70p/kg.

How does this payment compare to others made in the past during periods of economic crisis?

By way of historical comparison in the late 2000s at the time of the financial crisis, British Wool paid an average price to producers of 33p/kg. Clearly the Covid-19 epidemic crisis is much more serious for the wool market. If we sell the 2019/20 unsold stock at a higher price than our assumed value we will make a further payment on top of the 32p/kg average price to producers later this year in relation to the 2019/20 clip, depending on the economic outlook at the time.

Are there no government grants or loans we could access to help us?

You may be aware of the government guaranteed loan scheme, known as CBILs, which businesses have been able to access immediately, via the banks, to assist them through this period of uncertainty. The government set the eligibility criteria so as to exclude public sector bodies. As a wholly independent, self-funding business operating in a competitive market place, British Wool expected to be able to access this CBILs support. However, despite repeated representations from British Wool that it should be considered as a private sector business owned by its producers and thus eligible, the government has insisted that we be treated as a public sector body. Despite excluding British Wool from accessing CBILs support, government have thus far been unwilling to offer us any equivalent CBILs financing directly.

What is the outlook and how does this affect advance payments?

The hard fact is that the global cross bred wool market will be extremely difficult for the foreseeable future. Our aim is to manage your business in such a way that allows us to maximise returns to you, our producers, whilst ensuring we are still around for the next 70 years and more making a market for British wool. Thus, in light of the huge and unprecedented valuation uncertainty in the cross bred wool market place, having no access to the CBILs funding scheme and wishing to remain on a safe and sound financial footing, we will not be making an advance against 2020/21 clip wool and instead will make full payment for 2020/21 clips from May 2021 onwards once we have sold the clip and have valuation certainty. Should the market happen to improve somewhat in the next 12 months from the trough it is in at the moment, the price returned to you would see the benefit of this improvement.

Have cost reductions been looked at?

In addition, we are planning to reduce our annual operating costs further this year, on top of the best part of a £1m reduction in our annual operating costs that we have achieved over the course of the last three years. However, we must at the same time be wary of cutting our costs too deeply and in the wrong areas otherwise we will lose the vital skills, experience and infrastructure needed to continue on our medium to long term strategic path. It goes without saying that there are no pay rises or bonuses for any employee for this year. We have also furloughed a number of employees to offset our costs.

Can I still send my wool in safely?

As a producer organisation, the priority for us was to keep on operating in a modified, safe way after the Covid-19 epidemic arrived: collecting and receiving wool as normal which, under the circumstances, is quite an achievement and down in no small part to the hard-work and dedication of our depot employees. The rest of the British Wool team have been working remotely and as part of this we have moved to remote on-line auctions since the end of March, the first major wool auction in the world to do this.

What about shearing and new entrants?

Despite the challenging situation on the global market, British Wool continues to represent the best interests of wool producers and recently collaborated with industry partners to establish the Shearing Register and the Covid-19 checklist for shearers and farmers. We are also continuing to offer the New Entrants Scheme as part of our support for the future of the industry.

Prior to the current crisis what progress had been made?

Over the past 12 months we have started to demonstrate we can develop new British wool rich products with our international brand partners and thus achieve greasy wool values well above commodity auction prices, albeit this still represents a relatively small part of the UK clip. There are many more projects like these in the pipeline. We have been achieving a consistent price premium to New Zealand wool for the last two years (versus a circa 25% discount prior to that) through more effectively operating our auctions and adding new bidders so as to increase competitive tension, albeit from an unsatisfactorily low level. We have also improved our service to producers with new wool collection points where we previously had no coverage in their region and, for example, through faster processing of producer registrations and payments at Head Office. Details of this season's new collection points are on pages 30-34 of this publication. We shall continue to focus relentlessly on our objectives of improving still further the relative value of British wool in a very difficult global cross bred wool market and on improving further the level of service we offer you.

We are asking producers to support us through this very difficult season by bringing their wool into us so that we can preserve the volume use of British wool downstream, further develop our new British wool rich product ranges and emerge from the Covid-19 slump ready to exploit a strengthening market. Without the consolidation of your wool into commercial volumes through British Wool and our continuing to market it more and more effectively, the prospect will be for lower prices indefinitely. Remember in the Republic of Ireland and Europe, where only spot buying exists, prices have historically been less than half of those paid to British Wool producers.

Trusted Partner

Make no mistake marketing your wool through us represents the only realistic prospect of improved prices on a national scale in the medium and long term. Wool producers can be assured that British Wool, as a trusted partner, will be at the forefront of leading the growth and renewal of wool values, but this will take time. We will emerge stronger from this period, so long as UK wool producers stay together and continue to back their organisation, British Wool. Thanks once again to all our employees everywhere in the business who have been steadfast and hard working in the face of this crisis and thank you to you, our producers, for your continued support and business.

A MESSAGE FROM JIM ROBERTSON, CHAIRMAN BRITISH WOOL

Firstly, I hope you and your families are keeping safe and well during these unprecedented times.

I was delighted to be elected as Chairman of British Wool in April. The current Covid-19 pandemic is a challenging time for us all but British Wool has implemented a Covid-19 response plan to ensure we continue to operate effectively but in a safe manner.

For those of you that don't know me, I farm 1,700 acres of LFA land in Langholm, Dumfriesshire, running a flock of 950 South Country Cheviots and 50 Texel's, along with 100 Galloway cows. Over the past few years, I breed White bred Shorthorn bulls producing blue grey heifers and steers. I breed my own female replacements, both sheep and cattle, then sell pedigree Cheviot Rams at the annual SCC sale in October. Before being appointed Chairman, I was elected as regional board member for the Scottish Southern region in 2017 and Vice-Chairman in 2018.

Wool producers can be assured that I, as Chairman, with the support of my fellow board members will represent your best interests and despite the challenges posed by Covid-19, by working together we will come out of this stronger. I firmly believe that working together and cooperation is key and this is one of the main principals of who we are as an organisation.

British Wool is the trusted partner for all UK wool producers. We continue to operate, despite the current circumstances providing a high level of service with our network of UK depots and collection centres taking all types of wool, as we do every year. We continue to work with industry partners in representing the UK sheep & shearing sectors and supporting the next generation through our new entrants scheme and we continue to create downstream global consumer demand. Every producer marketing their wool through British Wool makes a valuable contribution in ensuring this important work can continue so future generations of sheep farmers can benefit, like we have, from the collective strength our organisation offers.

Finally, our long term focus remains to maximise the returns you receive from your wool. Despite some challenging times ahead over the coming 12 months, I'm confident, by working together as wool producers, we will emerge stronger and be in a better position to add value to the high quality environmentally friendly fibre we are all producing.

I wish you a safe and successful shearing season.

Best wishes

Jim Robertson, Chairman

AGM

The 2020 Annual General Meeting of registered producers will be held on Wednesday 11th November 2020. More details on the format at the AGM will be announced in due course.

GUIDANCE FOR DELIVERING WOOL TO DEPOTS

Due to the Covid-19 situation being fast-moving and a rapidly changing situation, this guidance may change at short notice. It's important to stay up-to-date with the latest advice provided by the government

The following should be followed when producers visit a depot to deliver their wool:

- All producers wanting to deliver their wool should make contact with the depot to make an appointment beforehand. A time slot should be given to each producer who should be encouraged to stick to the slot given. This enables us to manage risk and reduce the number of producers on site at any one time.
- Upon arrival at the depot, producers should report to a designated area near intake that will be clearly visible with signage / notices to ensure everyone complies with Covid-19 social distancing guidance when doing this.
- Producers will then be directed to where the intake area for delivery of their wool is located.
- A supply of disposable gloves will be made available in the intake area so that every producer handling wool sheets, wears protective gloves.
- Depot staff will frequently clean and disinfect high touch areas, for example, door handles.
- All visitors to the depot should avoid any contact with our employees and should only be on site for the time it takes to drop off their wool safely.
- Social distancing should be implemented at all times, if face to face contact is necessary, remain at least two metres away from depot staff and other visitors.

THE BRITISH WOOL PROCESS

1

Register with British Wool.

VAT registered? Complete a Self-Billing Agreement.

2

Wool sheets and labels distributed to producers via the depot network.

3

Sheep are shorn.

Fleeces are rolled & packed into wool sheets provided (green sheets for organic wool).

4

Wool sheets are labelled (name, address and registration number).

If using a haulier, please complete paperwork provided.

5

Wool sheets are collected by haulier or delivered by the producer to a depot or collection site.

6

Wool is graded by type and weight.

Producers receive grading notification.

7

Wool is packed into commercial weights and tested for yield, colour, and micron ahead of auctions.

8

Wool is sold in auctions held throughout the year.

9

Final value of wool is calculated based on the weight and grade delivered and the prices achieved at auction.

10

Balance payment is credited when wool is delivered next season.

FLEECE PRESENTATION

Well-presented fleeces are much quicker and easier to grade in our depots and help minimise our operating costs. Poorly presented fleeces and unrolled fleeces may be graded at a much lower value.

To maximise your clip value please follow the approved method of fleece presentation as illustrated below.

After shearing throw out the fleece onto a clean surface flesh side down.
(Fleeces from the Blackface, Herdwick and Rough Fell breeds should be laid flesh side up.)

Pick off any extraneous matter, e.g. straw, and remove any daggings.

Include only clean, dry belly wool with the fleece before folding the flanks towards the centre.

Turn in the britch end and roll the fleece firmly and neatly towards the neck.

After rolling, part the fleece.

Without twisting, tuck the neck wool firmly into the body of the fleece.

The finished fleece is firm and secure.
Place the tucked fleece firmly into the wool sheet.

Where possible pack fleeces from different breeds and types separately to avoid cross contamination and a reduced wool value.

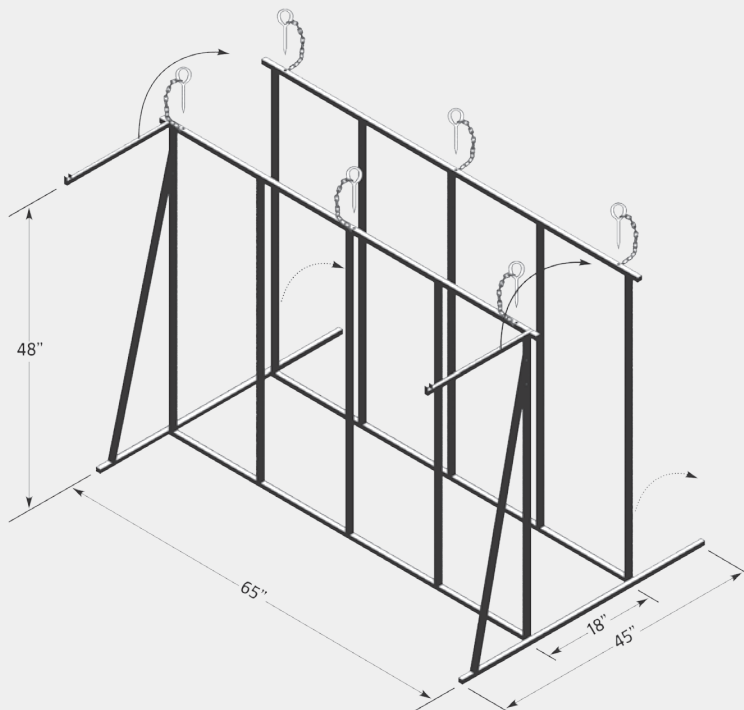

- Do not mix hill wool with lowland wool. Kemp from hill wools can cause cross contamination and spoil lowland fleeces.
- Do not mix coloured wool with white wool. Coloured fibres will contaminate white wool.
- Do not mix wool from hogs with wool from ewes and wethers.
- Keep Bluefaced Leicester and Teeswater / Wensleydale fleeces separate from mule fleeces. Fleeces can be placed in a bag within the same wool sheet.
- Do not mix oddments with fleece wool.

PACKING

Wool should be delivered to British Wool in wool sheets. These will be distributed by your local depot ahead of the new wool season. If you need wool sheets please contact your local depot directly.

To aid operations in our depots we ask that wool sheets are evenly filled and well packed. When properly packed, wool sheets should hold approximately 80kg of wool. This will however vary depending on wool type.

Use of a packing frame can help ensure that all sheets are evenly packed. These can be purchased from British Wool or improvised using a couple of farm gates / hurdles as shown below.

LABELS

Every year British Wool handles approximately 28 million kg of wool, in half a million wool sheets, from almost 40,000 producers. As such it is essential that all wool is clearly labelled by the producer.

All wool sheets should be clearly labelled with the producer's name, address and registration number. Your registration number is a unique identifier and has seven digits. Sheet labels are provided for this purpose with the wool sheets. One label should be attached to the outside of each wool sheet and another inserted in the sheet with the wool. If using a haulier, please complete paperwork provided.

If your wool is not clearly identifiable it is much more challenging for British Wool to ensure that you are paid correctly.

AVOID DAMAGING YOUR WOOL

Wool can be easily damaged which will impact negatively on price. In many cases this can be avoided with a little extra care.

Damaged wool (Fault code F)

Where sheep have been shorn damp, or fleeces have been stored in damp conditions, wool can become brittle and suffer from discolouration. Please store your wool in a clean dry place and avoid direct contact with concrete floors.

Vegetable matter contamination (Fault code V)

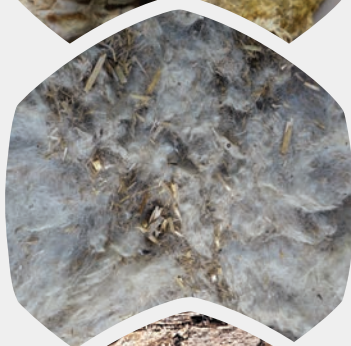

Some vegetable matter contamination is unavoidable in areas of natural grazing but many cases are avoidable. Please avoid shearing your sheep on straw.

Excessive marking (Fault code H)

Excessive marking can make it more difficult to process wool. Please use sheep marking fluids sparingly and always use British Wool approved marking fluids.

Please don't send in wool that has been damaged by Fly Strike. Fleeces containing maggots are likely to damage other wools.

Please refer to page 21 for full fault grade listing and prices.

LICENSED MARKER PRODUCTS

Our licensed marker products are easy to identify as they bear this logo.

ORGANIC WOOL

British Wool handles organic wool separately in order to maximise its value. Organic producers must deliver their wool in green wool sheets. If required these should be requested from your local depot.

Organic wool producers must also provide evidence of their organic status on the date their wool is delivered to British Wool. The Organic Certificate and associated trading schedule must state "Sheep". Only wool from the farm detailed on the Organic Certificate can be graded and paid as organic.

Approved UK Organic Control Bodies;

- Organic Farmers & Growers CIC (GB-ORG-02)
- Organic Food Federation (GB-ORG-04)
- Soil Association Certification Ltd (GB-ORG-05)
- Biodynamic Association Certification (GB-ORG-06)
- Irish Organic Association (GB-ORG-07)
- Organic Trust Limited (GB-ORG-09)
- Quality Welsh Food Certification Ltd (GB-ORG-13)
- OF&G (Scotland) Ltd (GB-ORG-17)

LAMB WOOL

Lamb wool is graded as it is received and paid for on the same basis as fleece wool. This allows us to spread the sale of Lamb wool through the year and ensures that producers receive fair value.

SECOND SHEAR WOOL

British Wool produces 3 grades of second shear (Medium, Romney and Mule). In order to be classed as second shear the wool must have sufficient staple length; wool that is shorn too short has very limited commercial value. In order to be graded as "Second Shear" rather than "Locks" the wool should generally have at least four month's growth. As a minimum the staple length should be 7.5cm (3 inches) and generally 10cm (4 inches). Any wool shorter than this is liable to be graded as locks and producers will be paid accordingly.

Please write 'Lambs Wool' or 'Second Shear' on wool sheets labels to identify these types of wool in your delivery.

MINIMISE YOUR TRANSPORT COSTS

Wool producers have the option of delivering their wool to one of our depots / collection sites or having it collected from farm by one of our network of hauliers. Contact details for each of our depots and collection sites are detailed in this booklet from page 29.

If you require your wool to be collected your local grading depot will also be able to put you in touch with the haulier that covers your area. Details of our depots, collection sites and hauliers can also be found on the British Wool website.

A small transport charge is applied for each sheet dropped off at a collection site or for sheets collected by haulier from farm. These are summarised below. **Deliveries to British Wool grading depots or our intermediate depots incur no onward carriage charge.**

- Collection centres: £5.15 per sheet.
- Haulier collections of 2000kg and above: £5.15 per sheet
- Haulier collections of 500kg to 1999kg: £7.45 per sheet
- Haulier collections of less than 500kg: £10.80 per sheet

Producers will also benefit from packing more wool into each sheet. By packing your wool into fewer sheets the carriage charges will be lower, based on the above volumes and rates.

Where possible, all wool for the 2020 season should be delivered no later than 28 February 2021. Wool delivered after 1 March 2021 may not be graded until after 1 May 2021 and will be paid in accordance with the 2021 wool season prices.

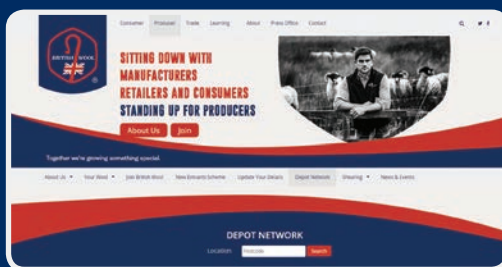

VISIT THE BRITISH WOOL WEBSITE

British Wool's website has a range of interesting and informative information specifically designed for producers including shearing training, best practice, new entrants' scheme, latest news and sale reports.

The website also includes an interactive depot locator section which allows producers to easily locate their nearest depot and transport options for wool delivery.

As well as having information for producers, the British Wool website also has sections specifically for Consumer, Trade and Learning. The web address is **britishwool.org.uk**

To keep up to date with all British Wool news, follow @britishwoolfarm on Instagram, Facebook and Twitter.

@britishwoolfarm

SITE RULES

British Wool is committed to ensuring compliance to legal requirements and the health and safety of all persons on site. We would ask you to please read and abide by the following information when visiting one of our depots.

Speed Limits - If you are travelling in a vehicle around the premises, please drive slowly and beware of potential vehicle movements and pedestrians on site.

Safety Signage - Please abide by all safety signs on display. If you are in any doubt, please speak to a member of staff who will be happy to assist.

Pedestrians - Please be aware of moving vehicles; e.g. cars, vans, lorries etc. as you move around the site and use any designated walkways as required.

Personal Protective Equipment (PPE) - High visibility vests must be worn in the warehouse and safety footwear must be worn where required. All persons when working at height must wear the harness / fall arrest system provided.

Visitors - If you are not alone and have passengers in your vehicle, please can you ensure that they remain in the vehicle until such times you have finished your visit. Alternatively, they must wait in the designated area as instructed by the member of staff. Under no circumstances are they allowed to enter the depot unaccompanied. Any persons under the age of 18 must be strictly controlled, supervised at all times and not allowed in operational areas.

First Aid - All our Depots have full first aid cover. In the event that you are in any way injured or suffer health problems, please alert a member of staff immediately.

Emergency Procedures - Your host will be familiar with the site emergency procedures. In the event of an alarm being raised, please follow all instructions given. Leave the building at the nearest exit and report to the designated assembly point.

Accident Procedure - If in the unlikely event that you are involved in an accident or near miss, you must report this to a member of staff so an investigation can be conducted in line with company procedures.

Smoking - There is a strict no smoking policy which applies to all our depots.

Environment - British Wool is committed to implementing initiatives to reduce our impact on the environment. Please help us by adhering to our environmental systems such as switching off lights and equipment when not in use, disposing of rubbish in accordance with our recycling policy, reporting any spills, leaks or defective equipment and minimising and preventing unnecessary waste.

In addition to this all visitors must comply with the guidance set out on page 5 of this publication

MARKETING YOUR WOOL

Our consumer marketing programme continues to make steady progress and we are starting to see some excellent opportunities through our Chinese Office. The overall aim of our marketing activity is to increase consumer and commercial demand ultimately leading to higher auction prices and increased returns for our registered producers. Examples of our marketing activity are shown below:

China

Our office in Shanghai has now been open for 15 months and despite the Covid-19 pandemic we are starting to make real progress. During the year we launched a British Wool bedding range with a Chinese brand called Lovo, selling over 29,000 duvets in our first season! This range is being developed further for 2020 and we are also looking at a potential range with Lovo's parent company Luolai who are one of the largest suppliers of home interiors in China.

We are also working on new product opportunities with a leading cloth manufacturer, a rug manufacturer and one of China's leading knitwear manufacturers.

As British Wool had never previously operated in China it is important that we start building our brand name both to businesses and consumers, this will help us add value to our Chinese partners in our new product projects. An important element of this is through social media and we have launched accounts on China's leading social media platforms - WeChat, Weibo and Little Red Book as well as a Chinese specific website. Although early days we are starting to see some positive results in terms of audience growth.

Licensee Scheme

Our licensee scheme underpins all of our marketing activity. The scheme traces the origin of the wool from the end product right the way back to the wool merchant. This process gives us the confidence that we are working with brands and promoting products that have high levels of British wool. The scheme has been rolled out globally and we currently have 44 licensees.

UK – Social Media

Our UK social media following has grown significantly over the past 12 months and we now have over 100K followers across all of our channels. This give us an excellent platform on which we can promote and grow our brand, promote our licensees products (driving sales) and communicate the benefits of wool products and wool in general. We plan to grow our following further in the coming year.

UK – other activity

Much of our other UK consumer activity has been delayed due to Covid-19 however we have made progress in the following areas:

- Our carpet retail activation programme is ready to go and will be rolled out once carpet retailers re-open.
- A new range of point of sale for bed and bedding retailers has been launched.
- We continue to attend consumer shows (such as Grand Designs) and the number of sales leads we are taking has grown significantly. We have also had more of a presence at agricultural shows promoting our licensees brands and products to a consumer audience.
- Work has started with a couple of Universities on longer term new product development projects where we are looking for new uses for British wool.

To find out more about our consumer marketing, email marketing@britishwool.org.uk
or follow @BritishWool on Facebook, Instagram and Twitter.

GRADING SYSTEM ADDS VALUE

Given the number of sheep breeds there is huge variety in the quality and characteristics of the wool produced in the UK. Grading every fleece individually adds value for our producers as this separates the better quality wool from the poorer, with the better quality achieving a higher price. The amalgamation of wool of a consistent type also enables it to be processed commercially by downstream manufacturers.

British Wool's grading system characterises wool based upon both its style and characteristics. The style of the wool is generally determined by its staple length, crimp, fineness, handle and lustre. There are six main style of British wool. These are; Fine, Medium, Cross, Lustre, Hill and Mountain. In addition British Wool produces a number of speciality wools. These have distinctive characteristics and are usually specific to a particular breed.. British Wool's speciality types are Dorset, Jacob, Masham, Teeswater / Wensleydale, Lincoln, Shetland, Exmoor Horn, Hebridean and Herdwick. Within each styles of wool fleeces are graded by quality with judgements made across a range of characteristics. These include; Whether the wool comes from a Hogg or a Ewe, Colour, Staple Strength, Uniformity, Kemp, Grey Fibre and Cotts.

In addition we produce a number of speciality grades for breeds such as Shetland and Bluefaced Leicester which have unique characteristics. Organic wool, lamb wool, winter shorn wool and oddments are processed separately.

Grading terms explained;

GRADING TERMS		GRADING TERMS	
HOGG	First shear up to 15 months growth	DISCOLOURED	Natural discolouration, yellowness in colour
EWE	Second or subsequent shear up to 12 months growth	SOFT COTTS	Slightly matted fibre
NO1	Good uniformity of style, length, colour with a sound staple	COTTS	Matted fibres
NO2	Average uniformity of style, length and possibly some slight discolouration and/or staple weakness	GREY	Grey fibre content more than expected within the fleece
		KEMPY	Kempy fibre content more than expected within the fleece

If you wish to see your wool being graded please contact your local depot before you deliver your wool.

WOOL AUCTIONS MAXIMISE PRICE

British Wool sells the graded wool by auction every two to three weeks providing industrial users with a consistent product and steady supply over the course of the year. A typical auction lot will weigh just over 8 tonnes, contains approximately 4,000 fleeces and may contain wool from more than 100 producers.

All auction lots are core sampled and the wool is independently tested for micron, colour, vegetable matter and dry yield. Testing is to international standards and provides data to buyers on the processing and performance characteristics of the wool. This in turn gives the buyers confidence in making informed decisions about the type and quality of British wool.

In July 2018, British Wool launched an Agency Buyer service to make it easier for new buyers to access the auction. We are optimistic that this service alongside our consumer marketing and product development initiatives will help to support British Wool and prices into the medium to long-term. We also welcomed our first new buyer in the auction room for a decade (+1m kgs).

SELF BILLING PROCESS

British Wool pays producers under a self-billing process whereby British Wool generates the Payment Advice rather than the producer invoicing British Wool. To operate in this way British Wool is required by HMRC to have a Self-Billing Agreement in place with all VAT registered producers, and producers registered under the Agricultural Flat Rate Scheme.

Payments to producers are liable to be delayed if we do not have a Self-Billing Agreement in place.

TRADING NAME ON ACCOUNTS

Given that British Wool generates the Payment Advices for producers we are under an obligation to verify the VAT details that a producer provides when they register with British Wool. Under HMRC regulations the trading name for each VAT registered producer should be the same as the name on their VAT registration.

KEEPING YOUR INFORMATION UP TO DATE

In order for British Wool to pay you accurately and quickly for your wool, please notify us of any changes to your details.

The Producer Services team can be contacted on **01274 688666** or by email at: **ps@britishwool.org.uk**

COMPLAINTS

Should you have any complaints regarding the service provided by British Wool we would ask that in the first instance you contact your local depot manager. If your local depot is unable to resolve the issue to your satisfaction please contact Producer Services on **01274 688666** or your regional representative.

BRITISH WOOL YOUR TRUSTED PARTNER

A partnership designed by farmers for farmers,
working together to support the UK sheep industry.

	British Wool	Competitors
Takes all types of wool, every year no matter what	✓	✗
True national coverage – making it convenient and cost effective for producers to send their wool	✓	✗
Working together with industry partners – representing the best interests of wool producers at all times	✓	✗
Supporting the next generation through shearing training and the new entrants scheme	✓	✗
Creating downstream global consumer demand – investing in the future of British wool	✓	✗

To find out more call us on **01274 688666**
or visit our website at **britishwool.org.uk**

Together we're growing something special.
