*Sustainable,
Ethical,
Responsible*

In the UK we have the most diverse range of sheep in the world with over 60 different breeds.

At British Wool we grade all of the wool we receive into approximately 100 different grades, these unique grades allow buyers to ensure the wool they are purchasing and using in their products is fit for the end application.

Volume of wool
20 million kilos

Number of members
30,000

Sheep farms in the UK are on average much smaller than those in other major wool growing nations with an average flock size of between 250 and 300 sheep with an average greasy fleece weight of 2 kgs per sheep. Within an average flock the farmer could have 10-20 different grades of wool, this is unique to the UK as many other major wool growing nations would only have a handful of different grades.

It is crucial to understand how different farming in the UK is to other major wool growing nations when looking at the different frameworks that are available as many are simply not feasible or indeed practical in the UK due to these differences.

British wool is an amazingly natural and renewable resource that can be used in many apparel applications from coating fabrics and knitwear to footwear and accessories. The diverse wool types on offer in the UK mean that British wool really can provide a truly sustainable solution for every brand.

The Shepherd's Crook Mark

The British Wool Shepherd's Crook Mark ensures that the wool in your knitwear is 100% British, carefully graded, and processed to the highest standards. By choosing British wool, you support UK farmers, guarantee the authenticity and traceability of your materials, and align your designs with the heritage, quality, and sustainability of locally sourced wool.

Provenance

All wool handled by British Wool comes from British farms, we do not grade and sell wool from anywhere else so all wool can be traced to British farms.

Traceability

British Wool have eight Grading Depots across the UK, all of the wool sold can be traced back to a specific Depot and give regional traceability. We can offer farm traceability to any of the 30,000 farms we receive wool from. Helping connect our wool producers to brands and consumers, giving an additional layer of transparency.

High Animal Welfare

Animal Welfare has been an integral part of British farming for centuries and the UK has led this area globally for many years and today have the strictest animal welfare laws in the world. All UK wool comes from non-mulesed sheep.

Quality Assurance

Every fleece we receive is graded by hand to determine both the style and the quality of the wool. This ensures the supply chain can trust the quality of wool they are using, year after year despite the nuances of it being a natural fibre.

Our six pillars *Sustainable, Ethical, Responsible*

Shepherd's Delight

Shepherd's Delight

A nod to the old weather lore of a red sky at night; this trend embraces warm and earthy tones in shades of red, yellow, rust, burgundy and berry. Highlighting the bright, fun and rich colours achievable on British wool yarns. These deep hues reminiscent of sunsets over pastoral landscapes, represents a return to the warmth and authenticity of heritage fabrics represented in classic tweed, tartan and check patterning.

Quiet Luxury

Quiet Luxury

Exuding understated elegance and a deep-rooted appreciation for tradition and nature, this trend draws inspiration from heritage styles associated with the countryside. Showcasing the bucolic charm of the English countryside estates through a palette dominated by lush greens and earthy tones. The focal point of this trend embraces the philosophy to prioritise intrinsic quality and craftsmanship over ostentatious displays of affluence. Patterns inspired by pastoral scenes not only captivates with its visual appeal but also offers a nod to the sustainable and renewable use of British wool as a fibre.

Natural

Natural

Whether inspired by nature's palette or opting for undyed yarns, these fabrics embrace subtlety and versatility whilst exuding natural elegance and provides a refreshing departure from vibrant, artificial tones. This trend brings into focus the natural spectrum of colours that British sheep breeds can offer from creamy whites, soft greys, fawns and subtle blacks, rooting a deeper connection with the fibre origin and the shepherds who steward the land around us.

Dark Academia

Dark Academia

Drawing inspiration from traditional British academia, classic literature and gothic architecture. This fusion of intellectual nostalgia and timeless sophistication, evokes a feeling of romanticised scholar-chic. Think ivy-league preppy meets gothic grunge. Characterised by a palette dominated by deep, rich hues of navy, charcoal blacks, ashy greys and espresso browns. Evoking a sense of timeless style with classic weave structures emphasising texture and quality craftsmanship. Focusing on fabrics that can withstand the test of time both in style and durability.
